Update on status.

I met with the operator, Jason Thompson on September 30, 2013. After reviewing his proposed bond calculation, it was noticed that he did not include any bonding for reclamation of the new access road. He was hopeful that SITLA would eventually want this road for access. After discussing that until end of mine, we need to bond. At reclamation time, it SITLA wants the road to remain, that we will not require it. He agreed, and will include the road in the bond calc. and submit it in the next few days.

The NOI is ready for approval with the exception of the bonding.
